Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX.

A

Adams, propagation of long electric waves along wires, 364, xviii
Agave, species in, xii, 231
Alphabet, the origin of our, and the race of the Phenicians, xv
Antarctic exploration, committee on, report, vii, viii, ix, x
——, geology and polar climate, vii, 200
Antiseptic method, modern, iv
Asteroids, origin of the zone of, etc., 351, xviii

B

Balch, E. S., report on reëxploring Wilkes Land, vii, viii
Barnard, photographic observations of Daniel's Comet, 3
Bauer, magnetic results of the first cruise of the Carnegie, xiii
——, solar activity and terrestrial magnetic disturbances, 130
Benedict, influence of mental and muscular work, etc., iv, 145
Berlin University, invitation to centennial of, xvii
Brain of about one-half the average weight, from an intelligent white man, xi, 188
—— of an eminent chemist and geologist, xi
Branner, geology of the black diamond regions of Bahia, Brazil, iii
Burial customs, Australia, furthur notes on, xvi, 297

C

California, serpentines of central coast ranges of, 315
Carbon, conservation of the energy of, x, 49
Carnegie, magnetic results of the first cruise of the, xiii
Carrel, new surgery of the viscera of the chest, xi
Central Coast Ranges of California, serpentines of, 315
Climate, polar, vii, 200
Cobb, a method of using the microscope, xii
Comets, spectra of recent, xiv
Congrès Géologique International (xi^e), invitation, v
Congrès International de Botanique (iii^e), invitation, iii

D

Da Costa, suicide, xviii
Daniel's Comet, 3
Davenport, new views about reversion, xv, 291
Davies, tunnel construction of the Hudson and Manhattan Railroad Co., v, 164
Davis, antarctic geology and polar climates, xii, 200
Davis, the Italian Riviera, xii
Diamond regions of Bahia, Brazil, black, iii
Doolittle (C. L.), Obituary Notices of Simon Newcomb, xiv, *iii*
—— (Eric), some interesting double stars, xiv
Du Bois, the great Japanese Embassy of 1860 vi, 243

E

Electric waves, propagation of long, along wires, 364
Electricity, the one fluid theory of, x
Ether, the past and present status of the, x
—— drift, 52, x
Evolution experimental, xv
——, results of recent researches in cosmical, xiv, 207
Explosions in mixtures of petroleum vapor with air in tubes, the propagation of, xii, 203

F

Fairchild, a new world for exploration, v
Flexner, experimental poliomyelitis in monkeys, xi
Fluorescence and phosphorescence, effects of temperature on, x, 267
Francke, roman mysticism in the fourteenth century, vi
Frost, spectra of recent comets, xiv

G

Geology, antarctic, and polar climates, xii, 200
Germ Plasm, experimental modification of the, xv
German-American research, new fields of, vi
German monk of the eleventh century, vi
Germinal analysis through hybridization, xv, 281
Gibbs, Oliver Walcott, obituary notice of, *xix*, xvi
Glaciers, characteristics of existing continental, xi, 57
Government of the United States in theory and practice, vi
Greek theories of sound and consonance, vi
Groups generated by two operators, etc., xiv, 238

H

Hale, the work of the Mt. Wilson Solar Observatory, xii
Harshberger, the use of the hydrometer in phytogeographic work, xii
Haupt (P.), the origin of our alphabet and the race of the Phenicians, xv
Heyl, conservation of the energy of carbon into electrical energy on solution in iron, 49, x
Hindu Epic, magic observances in the, 24, vi
Hinrichs, the true atomic weights of oxygen and silver, 359, xviii
Hobbs, characteristics of the inland ice of the Arctic Regions, xi, 57
Hopkins, magic observances in the Hindu Epic, 24, vi
Hough, principle of relativity and its significance, xvi
Howland, a German monk of the eleventh century, vi
Hybridization, German analysis through, xv, 281
Hydrometer, the use of the, in phytogeographic work, xii

I

Ice, inland, of the Arctic Regions, 57, xi
Inheritance in non-sexual and self-fertilized organisms, xv
International American Scientific Congress, invitation, vi
—— Geographic Congress, invitation to tenth, xvii
Italian Riviera, xii

J

Japanese embassy of 1860, vi, 243
Jastrow, the bearded Venus, vi
Jennings, inheritance in non-sexual and self-fertilized organisms, xv
Johnson, the suppression and extension of sporogenous tissue, in Piper Betel, xii
Jones, some recent results in connection with the absorption spectra of solutions, xii

K

Keen, modern antiseptic method and the rôle of experiment in its discovery and development, iv
Keller, radio-active substances, xvi
Kramm, serpentines of the central coast ranges of California, 315

L

Landscapes, infra-red and ultra-violet, x
Learned, new fields of German-American research, vi
Leptauchenia decora, the restored skeleton of, xi, 196
Lovett, certain irregularities in the problem of several bodies, xiv

M

Magie, physical notes on Meteor Crater, Arizona, 41, x
Mathews, further notes on burial customs, Australia, xvi, 297
Meeting, general, v
——, stated, iii, iv, v, xvii, xviii
Members deceased:
Agassiz, Alexander, v
Barker, George F., xvii
Biddle, Hon. Craig, xvii
Blake, William Phipps, xvii
Brown, Arthur E., xviii
Converse, John H., xvi
Dudley, Charles B., iii
Elliott, A. Marshall, xviii
Genth, Frederick Augustus, xvii
Giglio, Enrico Hillyer, iii
Harris, Joseph S., xvii
Huggins, Sir William, xvi
Kohlrausch, Friedrich, iv
Lamberton, William A., xvii
Mantegazza, Paolo, xvii

Members deceased (continued):
Morris, Israel W., iii
Much, Mathaeus, xvii
Patterson, Hon. Edward, iv
Schiaperelli, Giovanni, xvii
Sinkler, Wharton, v
Vose, George L., vi
Whitfield, Robert Parr, vi
Wood, Richard, xvii
Members elected, xii, xiii
—— presented, xiv, xvi
Membership accepted, xv, xvi, xvii
Mercury vapor, new optical properties of, x
Meteor Crater, Arizona, 41, x
Microscope, a method of using the, xii
Miller, groups generated by two operators, etc., xiv, 238
——, relations between substitution group properties, and abstract groups, 307
Monk, German, of the eleventh century, vi
Morley, obituary notice of Oliver Wolcott Gibbs, *xix*, xvi
Mount Wilson Solar Observatory, xii
Munroe, the propagation of explosions in mixtures of petroleum vapor with air in tubes, 203
Mysticism in the Fourteenth Century, Roman, vi

N

New world for explorations, v
Newbold, early Greek theories of sound and consonance, vi
Newcomb, Simon, obituary notice of, *iii*, xiv
——, presentation of a portrait of, xiv
Newton's rings as zone-plates, xi
Nichols, Ernest Fox, Modern Physics, xviii
Nichols, E. L., the effects of temperature on fluorescence and phosphorescence, x, 267
Nipher, the one fluid theory of electricity, x
Nutritive processes, influence of mental and muscular work on, iv, 145

O

Obituary notice of Oliver Wolcott Gibbs, *xvi, xix*
——— Simon Newcomb, *xiv, iii*
Officers and Council, election of, iii, iv
Osborn, correlation of the Pleistocene of the new and old worlds, xi
Oxygen and silver, true atomic weights of, 359, xviii

P

Paramylodon, dermal bones of, from asphaltum deposits near Los Angeles, xi, 191
Patterson, the government of the United States in theory and practice, vi
Phenicians, the origin of our alphabet and the race of the, xv
Pickering, a standard system of photographic stellar magnitudes, xiv
Piper Betel, the suppression and extension of sporogenous tissue in, xii
Planets about the fixed stars, xiv, 222
Pleistocene of the new and old worlds, xi
Poliomyelitis in monkeys, experimental, xi
Pragmatism, vi
Primates of the old and new worlds, xi
Pseudomorphs, petrifactions and alterations, 17, iv

R

Radio-action the cause of Hale's anomalous solar spectrum, xiv
—— in the heavenly bodies, xiv
Radio-active substances, xvi
Relativity and its significance, xvi
Reversion, new views about, xv, 291
Rogers, notes on some pseudomorphs, petrifactions, etc., 17, iv
Roman mysticism in the fourteenth century, vi
Russell, on the distances of red stars, xiv, 230

S

Schamburg, vaccination and the ravages of small-pox among royal and noble families, v
Schelling, the new Shakespeare discoveries, vii
Schinz, the real meaning of the controversy concerning pragmatism, vi
See, existence of planets about the fixed stars, xiv, 222
——, further considerations on the origin of the zone of asteroids, etc., 351, xviii
——, results of recent researches in cosmical evolution, xiv, 207

Sergi, the primates of the old and new worlds, together with man, xi
Serpentines of the central coast ranges of California, 315
Shakespeare discoveries, vii
Shull, germinal analysis through hybridization, xv, 281
Silver, true atomic weight of, 359
Sinclair, dermal bones of paramylodon from the asphaltum deposits of Rancho la Brea, xi, 191
——, the restored skeleton of leptauchenia decora, xi, 196
Smith, scientific work of the U. S. Bureau of Fisheries, xviii
Snyder, radio-action the cause of Hale's anomalous solar spectrum, xiv
Solar activity and terrestrial magnetic disturbances, 130, xiii
Solutions, absorption spectra of, xii
Sound and consonance, Greek theories of, vi
Spitzka, description of the brain of an eminent chemist and geologist, xi
Standards, National Bureau of, v
Stars, the distances of red, xiv, 230
——, the existence of planets about the fixed, xiv, 222
——, some interesting double, xiv
Stellar magnitudes, xiv
Stratton, national bureau of standards, v
Substitution group properties and abstract groups, 307

T

Temperature, effect of, on phosphorescence and fluorescence, x, 267
Tide-predicting machine of the U. S. Coast and Geodetic Survey, xiii
Tittman, the new tide-predicting machine of the U. S. Coast and Geodetic Survey, xiii
Tower, experimental modification of the germ plasm, xv
Trelease, species in agave, 231, xii
Trowbridge, the ether drift, 52, x
Tunnel construction of the Hudson and Manhattan Railroad Co., v, 164
Universal Races Congress, First, invitation to, xvii

V

Vaccination and the ravages of smallpox among royal and noble families, v
Venus, the bearded, vi
Viscera of the chest, xi

W

Waves, propagation of long electric, along wires, 364
Webster, the past and present status of the ether, x
Wilder, a brain of about one-half the average weight from an intelligent white man, xi, 188
Wilkes Land, vii, viii
Wood, Newton's rings as zone-plates, xi
Work, influence of mental and muscular, on nutritive processes, iv, 145
